

YESFUTURE

WELCOME TO YES FUTURE

www.yesfuture.live

ABOUT US

Yes Future Live

is a fully decentralized digital ecosystem designed to provide users with transparent, secure, and community-driven opportunities. The system operates through decentralized technology, allowing users to participate directly without depending on a traditional central authority.

Our platform combines a structured package system, automated income distribution, community growth, and digital financial opportunities within one ecosystem.

With a simple and user-friendly process, YesFuture.Live aims to make decentralized participation accessible to users around the world.

YESFUTURE

MISSION & VISION

Our **MISSION** is to build a transparent, secure, and accessible decentralized ecosystem where every participant can explore digital opportunities with confidence.

We aim to:

- ❖ Provide a simple and user-friendly decentralized platform.
- ❖ Promote transparency through technology-based operations.
- ❖ Build a strong global community.
- ❖ Create a fair and structured participation system.

Our **VISION** is to become a trusted global decentralized ecosystem that connects technology, community, and financial opportunities.

We envision a future where people can participate in a transparent digital system without unnecessary intermediaries. YesFuture.Live aims to make decentralized

WHAT IS USDT

USDT, also known as **Tether**, is a stablecoin designed to maintain a value close to the U.S. dollar.

It is widely used in the cryptocurrency market for trading, payments, fund transfers, and storing digital value. Unlike Bitcoin and other cryptocurrencies, USDT usually has lower price volatility because its value is linked to the U.S. dollar.

USDT can be transferred through different blockchain networks, such as **TRC-20**, **ERC-20**, and **BEP-20**. Users must always select the correct network while sending or receiving USDT.

KEY POINTS

- USDT is a stablecoin.
- It is commonly linked to the U.S. dollar.
- It helps reduce crypto price volatility.
- It is used for trading and digital payments.
- It can be stored in crypto wallets.
- It supports fast global transfers.
- It is available on multiple blockchain networks.
- The sender and receiver must use the same network.
- Network fees depend on the selected blockchain.
- USDT is not the same as money held in a traditional bank account.

YESFUTURE

WHAT IS CRYPTOCURRENCY

CRYPTOCURRENCY

is a form of **digital currency** that can be used to send, receive, and store value through the internet. Unlike traditional money, cryptocurrency does not exist as physical notes or coins. It is stored in digital wallets and transferred through blockchain networks.

Popular cryptocurrencies include **Bitcoin, Ethereum, USDT, and BNB**. People use cryptocurrency for online payments, trading, investment, and international fund transfers.

BLOCKCHAIN TECHNOLOGY

- Blockchain is a digital record of transactions.
- Transactions are stored in connected blocks.
- Once recorded, information is difficult to change.
- It improves security and transparency.
- The network is maintained by multiple computers.
- It allows users to transfer digital assets without relying only on traditional banks.
